1	2	3	4	5	6	7	8	9	10

100: No communication with partner  
 95: Unprotected sex in water  
 82: Used oil-based lube with condom  
 84: Keep genital area clean  
 77: Use of dental dam (oral sex)  
 72: Asymptomatic STD  
 70: Used a water/silicone-based lube with condom  
 52: No condom  
 45: Hepatitis B vaccine  
 47: Contacted partner's open sore  
 36: Did not share needles  
 35: Did not tell partner about STI  
 22: Took antibiotics immediately after STI diagnosis  
 23: Kissed with herpes  
 29: No dental dam  
 12: Told friend about safe sex  
 11: Get checked for STIs  
 2: Use condom

**Aim:**  
To get to square 100 from square 1 while learning about STI prevention.

**Rules:**

- 1) Have each player roll on die to determine who plays first. The player with the highest number goes first.
- 2) Roll the die. Move your piece however many times is says on the die.
- 3) If you reach the *bottom* of a ladder, read the text in the square and move up the ladder to the new square. If you reach a snake's head, read the text in the square and follow the snake to the new square.
- 4) The first person to land exactly on 100 wins! If you roll too high a number, your player piece "bounces" back until you roll an exact number to land on the last square.

- Ex: if you are on "98" and you roll a 6, then you move up to 100 and bounce back to 96.
